c) Understand how the HTML, CSS and JavaScript components of Bootstrap work

d) Create responsive webpages

e) Customise and optimise a Bootstrap installations and plugins

9. Outline of Workshop

Workshop on **"Web Application Prototype Development Using Bootstrap"** aims to impart technical and practical knowledge regarding Web Application development using Bootstrap to students of bachelor degree in Computer Science and Computer Application. The meeting was started at morning 11:00 am with Saraswati Vandana. **Mrs. Jinil Jacob** (Assistant Professor) introduced the theme of the workshop. **Dr. Rajeev Singh** (Principal
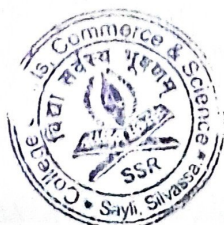

SSR Arts, Commerce and Science, Silvassa, Dadra and Nagar Haveli) has given inaugural speech and inaugurated the workshop. During his speech, he guided students regarding importance of workshops and training programs in early student life. He congratulated the all faculty members for the organizing the workshop.

The two days technical session was conducted by the **Mr. Sanjug Sonowal**. He started the workshop with the Current trends of web development and bootstrapwith its advantages and disadvantages. He explained the topic with practical implementation and showed some live examples where bootstrap has been used. He explained them the benefits and challenges it will bring to day-to-day activities and how it can benefit them irrespective of their branch. He discussed the importance, usefulness and impact of this new technology in today's digital world. He briefed the students about the types of validation, plugins, components, basic hardware and software requirements for web application development using Bootstrap.

He provided insights about Bootstrap programming and its implementation. He explained them bootstrap architecture, its components and various resources. He not only explained it analytically but also demonstrated by creating demo webpages using bootstrap and shared with the students for further practice.

Contents explained by Mr. Sanjug Sonowal:

1) Introduction to Bootstrap.

2) Discussion about various methods and components of bootstrap.

3) How to add dependent files and plugins while creating web pages.

4) Core components and resources available for bootstrap programming.

5) Difference between websites created using bootstrap and other programming language.

6) Discussion on Compilation/ implementation of bootstrap in making webpages.
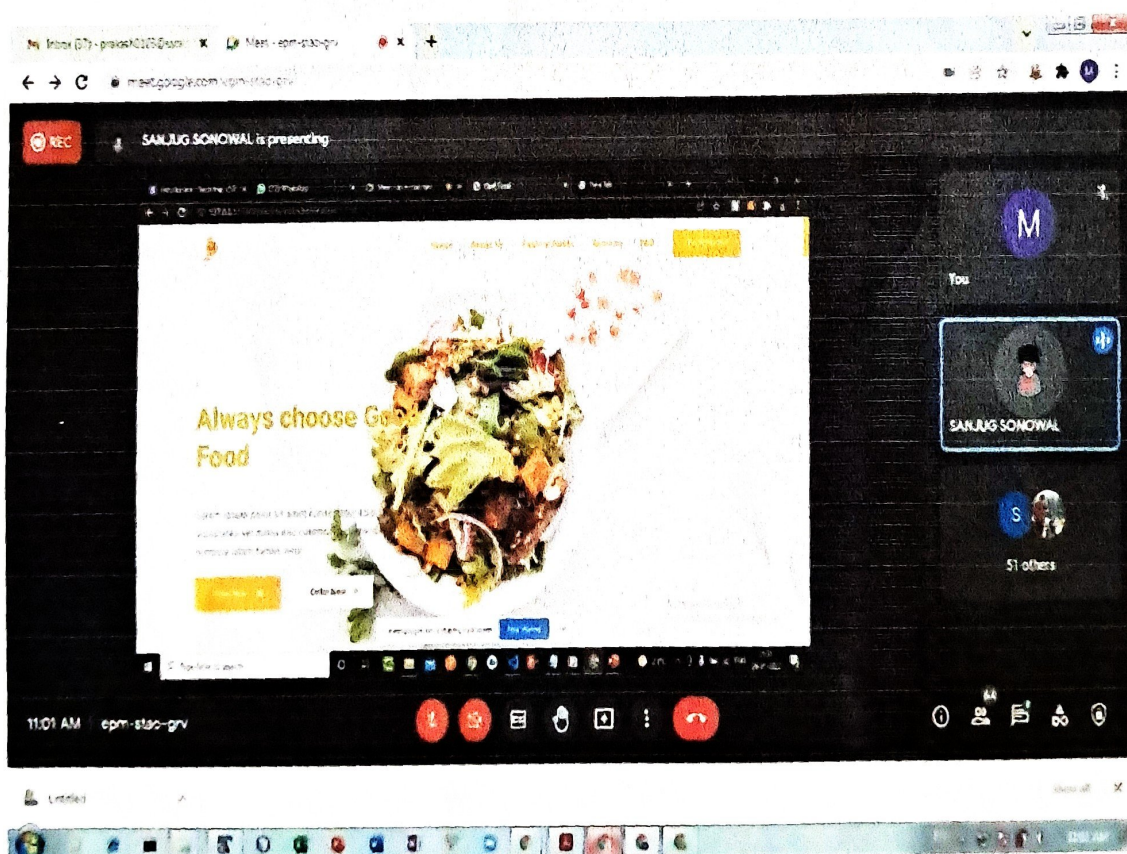

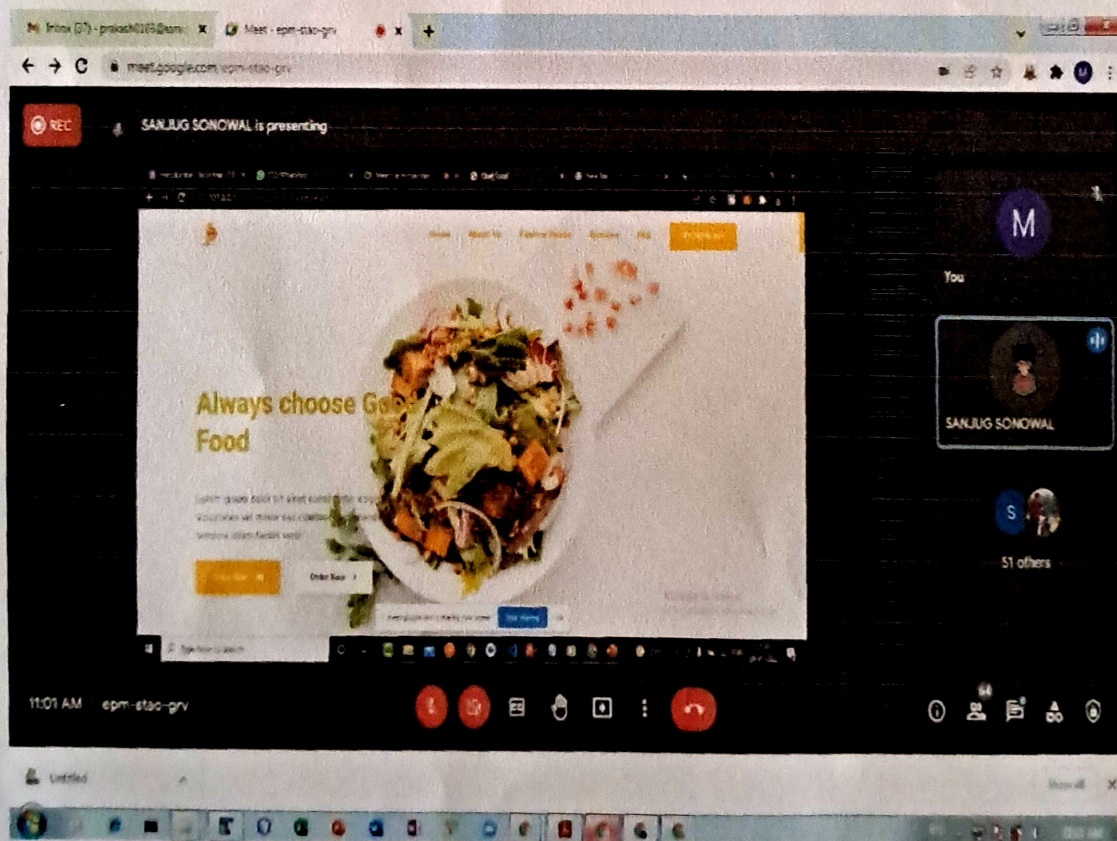

After the workshop, the students asked him the questions and he answered them aptly.The students got insights about how bootstrap websites will disrupt the digital world, how can it be useful to them and how it will bring the change in the web development area.
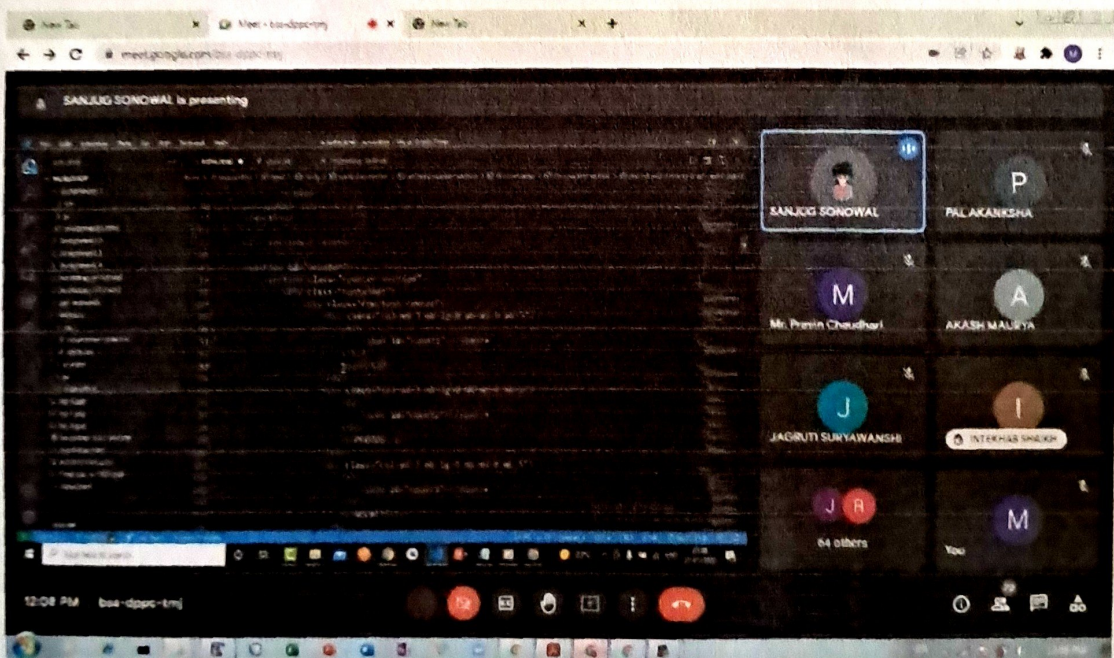

Mrs. Jinil Jacob offered vote of thanks with full of gratitude.

10. Conclusion:

From this workshop students were trained to inculcate bootstrap in the web application for making it more responsive and writing code for the application. Students felt that this value-added session on web application development using bootstrap was very much useful for them and they got the basic idea for developing responsive web application.
